DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

The following section headings should be inserted into the specification:

On page 1, line 1: Insert -- FIELD OF THE INVENTION --.

On page 1, line 5: Insert -- BACKGROUND OF THE INVENTION --.

On page 2, line 1: Insert -- SUMMARY OF THE INVENTION --.

On page 3, line 26: Insert -- BRIEF DESCRIPTION OF THE DRAWINGS --.

On page 4, line 5: Insert -- DESCRIPTION OF THE PREFERRED EMBODIMENT --.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the phrase "or the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP

§ 2173.05(d). (The examiner wishes to note that claims 2-21 are rejected for the same reason since they are dependent upon claim 1.)

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, and 19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Johansson et al (US 4,355,440).

Johansson et al discloses a pocket 15 incorporated in a garment 16, the pocket 15 including restriction means 10 to restrict the removal of objects from the pocket 15. The restriction means 10 being controllable to cause the means to restrict to apply a restricting action on the occurrence of an enabling signal, wherein the enabling signal is generated at the command of a user, and wherein the restriction action terminates on cessation of the enabling signal. (See figures 1-3 and 5; abstract; col. 3, line 22 to col. 6, line 9)

Allowable Subject Matter

6. Claims 3-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the

base claim, any intervening claims, and to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

7. The following is a statement of reasons for the indication of allowable subject matter: The prior art to Johansson et al teaches a wallet theft guard for retaining a wallet in a pocket, however the prior art of record, taken alone or in combination, fail to teach or fairly suggest a pocket including restriction means being controllable to cause the means to restrict to apply a restricting action on the occurrence of an enabling signal, wherein the enabling signal is generated in response to an output signal status of at least one sensor.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Dixon (US 5,477,562) discloses an apparatus for the retaining of the contents in pockets of garments.

Devlyder (US 5,031,281) discloses a wallet securement apparatus.

Biloff (US 4,891,965) discloses an apparatus for securing an article in a pocket.

Hamilton (US 4,194,271) discloses an apparatus for releasably retaining articles in pockets.
